

# > UX Engineer

Drupal themer and site builder

## Background

Small Axe is a specialist marketing & communications agency for nonprofits, political campaigns and social enterprise. We deliver from concept through production to promotion, for clients of all sizes around the world. Whatever the communications challenge, we'll help our clients understand their audiences, craft powerful content that moves them, and get it to them at the right time.

## What you'll be doing

You'll join our growing technology team. We're looking for a UX Engineer Drupal developer with an eye for design and the ability to find common solutions to problems rather than reinventing the wheel. You would be required to work with senior technologist and designers from Small Axe in building and delivering web solutions for our clients.

We're technology agnostic which means every day is a new challenge. Supporting clients using Salesforce, Drupal, Wordpress, CiviCRM, Engaging Networks, Blue State Digital Tools, Nation Builder, ModX and more technologies besides.

Our team is distributed all over the world. Brazil, UK, USA, Sri Lanka, India and Australia are all represented. But we're investing in building a team in Colombo so this job will be the second in our new Colombo Office.

## Person specification

### Essential

- ☐ 1 - 2 years experience in Drupal web application development
- ☐ Experience using HTML, CSS and JQuery
- ☐ Writing elegant CSS using SASS and frameworks
- ☐ Experience in Drupal theming
- ☐ Drupal site building: views, panels, contexts.
- ☐ Experience in building responsive sites
- ☐ Excellent, proactive communication
- ☐ Good problem solving skills
- ☐ Proficient written and verbal English

### Desirable

- ☐ Wordpress theming
- ☐ Adapting designs from Photoshop or Illustrator artwork files
- ☐ GIT, Drush

## The job

- ☐ You will work with our design teams in building high quality web based assets
- ☐ You will work with people who are passionate about their work and who are always looking to improve on what they do
- ☐ You will work with technical leadership in marking out the most appropriate technical solution and implementing it
- ☐ You will build dynamic and eye catching responsive websites based on the latest techniques in UI/UX
- ☐ You will be involved continuously in reviewing, reworking and improving your code and other digital assets
- ☐ Where required you will build custom components to supplement the available building blocks
- ☐ You will constantly be involved in researching new ways of implementing common use cases and in contributing them back to the open source community

## Expressions of interest

Send a short portfolio or resume along with a cover letter answering the following questions as creatively as you like to: [joinus@thesmallaxe.com](mailto:joinus@thesmallaxe.com). Or apply online on our website at <http://bit.ly/1KBWfYM>

1. Tell us about something or someone that inspires and motivates you to make the world better.
2. What makes you get out of bed in the morning?
3. Tell us about a significant technical challenge that had you tearing your hair out and how you went about solving it.
