Contact Dr. Mark A. Friedman (as below) if arriving on time is a problem.

Presentations:

An Approach to Theming with Drupal

Shaun Gorneau, Director of Web Development, Reynolds Companies

Shaun Gorneau, Director of Web Development at Reynolds Companies, will give a presentation on his approach to theming with Drupal: starting from a general approach to a website's design, followed by mapping the design to Drupal objects, and concluding by taking the design (HTML + CSS) and injecting the Drupal bits. He will include advanced theming topics such as styling of individual content types, unique styling of a single node, an approach to using views, and the use of template.php.

Experience with Drupal including Ubercart and the Spaces+Features+Organic Groups Stack

Michael Stenta and Dylan Riordan, Energy Circle

Michael Stenta and Dylan Riordan of Energy Circle will give a quick run-through of their experiences with Drupal, what made them fall in love with it, what they've done with it, and where it's all going. Topics will include Ubercart and the Spaces+Features+Organic Groups stack.

Drupal (drupal.org) is a powerful, free and open source content management system (CMS) that allows an individual or a community of users to easily publish, manage and organize a wide variety of content on a website. The Central Connecticut Drupal Meetup Group serves to build and strengthen the community of Drupal developers, designers, administrators, content creators and other stakeholders in Connecticut through organizing educational and interactive, monthly, face-to-face meetings. Come meet fellow Drupalists. Come learn what Drupal can do for you and the best practices to apply when using Drupal. Come help steer our group to become an invaluable source of information and networking opportunities. We are a passionate and fun group, enthusiastic to grow and help all those interested in Drupal - beginners, journeymen and experts - by sharing our collective knowledge, expertise, experiences and ideas.
