

DIVE INTO LEARNING DRUPAL (an open source content management system / website software see: drupal.org)

OCT. 2nd at 6:30 PM

The Sarasota Drupal User Group is happy to announce that our meetings will now be held at the University of South Florida Sarasota Manatee at 8350 N. Tamiami Trail in Room B106.

Stephen Barker will be presenting an overview of deployment strategies (moving your site from “dev” to production) in different versions of Drupal. We have great things coming in Drupal 8.

USFSM has a nice new campus with great facilities – we will have access to a projector / screen and their WIFI network.

Our October 2nd meeting will also be a forum to welcome new members and plan out our next meetings.

We will also reserve time for total beginners and people that want to get some advice on projects they are working on.

Drupal is the software that powers many large and small websites from the White House to a small blog. There are many free online training resources that we will be highlighting.

All are welcome.
